

RESOLUTION

Cap and Trade

Adopted by the DCRP Executive Committee

October 27, 2009

Sent to the Tennessee Congressional Delegation

The Davidson County Republican Party asks that the Tennessee Congressional delegation vote against the imposition of additional taxes or fees on the energy industry and to support a comprehensive national energy strategy that promotes the development of all forms of energy and recognizes that oil and natural gas will continue to play an important role in this nation's energy future.

We join the overwhelming majority of Americans who support expanded domestic production as well as the oil and natural gas industry's role in improving the American economy, supporting American job creation and strengthening our national energy security.
